1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nesvadba et al, US Patent No. 5,614,572.

Nesvadba et al discloses aromatic vinyl monomer based polymers and arylbenzofuranone compounds which directly correspond to those of applicant's claims. No patentable difference is readily ascertained. See col. 12, lines 39-67 and the claims.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nesvadba et al. as applied to claims 1 and 2 above.

5. Nesvadba indicates that the compounds may be incorporated into the the resin by any known method and may exist in any known form. Therefor, addition of the arylbenzofuranone to the monovinyl monomer prior to polymerization of the resin would have been obvious to one of ordinary skill in the art. Likewise, addition of the arylbenzofuranone to the monovinyl monomer subsequent to polymerization of the resin would have also been obvious to one of ordinary skill in the art. Particulars of the polymerization process such as devolatilization and uniform mixing are procedures which are well known to the art-skilled and are not seen to be an

unobvious limitation absent a clear showing of unexpected results attributable to these procedural aspects. See col. 19, line 42 through col. 20, line 29.
